Summary

Purposed Software Developer with two years of experience in web development, specializing in front-end technologies and a proven history of successful collaborations with five major clients. Currently advancing expertise in information security and forensics, I leverage strong coding proficiency and critical thinking to develop innovative software solutions. My commitment to continuous technical enhancement ensures I remain current with emerging technologies, consistently delivering high-quality, user-centric applications that exceed expectations in the dynamic field of software development.

Key Strengths & Skills

- **Full-Stack Development:** Proficient in HTML, CSS, JavaScript, Java, Ruby, and SQL. Applied skills in various projects, including the development of a church website for Deliverance Church Utawala.

- **Project Management:** Successfully managed and delivered projects such as a parking system for TMK Parking, demonstrating strong organizational and project management abilities. Ensured timely completion and functionality of developed systems.

- **Collaboration & Teamwork:** Adept at collaborating with cross-functional teams, fostering effective communication, and contributing to the success of collaborative projects. Evidenced in the completion of the Hotel Payment System for Le Grand Forest Dreams Hotel.

- **Problem-Solving & Critical Thinking:** Possesses strong critical thinking skills essential for identifying and addressing software development challenges. Demonstrated critical thinking in finding innovative solutions during the development of Collo Photography for Collins Mwangi.

Project Portfolio

- **Deliverance Church Utawala Website:** Developed a fully functional website incorporating HTML, CSS, JavaScript, and Ruby. Enhanced the church's online presence and provided a user-friendly platform for information dissemination.

- **Collo Photography for Collins Mwangi:** Contributed to the creation of an interactive and visually appealing photography portfolio utilizing HTML, CSS, and JavaScript.

- **TMK Parking System:** Led the development of a comprehensive parking system, streamlining operations and improving efficiency and customer experience.

- **Hotel Payment System for Le Grand Forest Dreams Hotel:** Collaborated on the creation of a secure and efficient hotel payment system, enhancing overall service delivery.

- **Alertsphere Mobile App:** Developed a mobile application. (Further details available on GitHub: https://github.com/Trevor-Kayeyia-Madara/alertsphere)

Work Experience

- **Freelance Web Developer**
  - For two years
  - Successfully collaborated with five major clients, specializing in front-end technologies.

- **Intern, Computer Pride Ltd**
  - May 2025 – Present
  - Gaining knowledge about ERP systems (e.g., SAGE 200 Evolution) as a Software Consultant Intern.

Education

- **Bachelor of Information Security & Forensics, KCA University**
  - Commenced: September 2021 (Ongoing)

- **Software Engineering Certification, Moringa School**
  - Graduated: November 2023

- **K.C.S.E, Utumishi Boys Academy – Gilgil, Kenya**
  - Graduated: April 2021
  - Mean Grade: B-

- **K.C.P.E, Carmel Catholic Primary School, Nairobi, Kenya**
  - Graduated: November 2016
  - Mean Grade: 363 marks

Volunteer Work

- **St. John's Ambulance**
  - Engaged in volunteer work, contributing to community health and safety initiatives.

Interests Traveling, listening to music, and watching movies. These activities foster relaxation, creativity, and adaptability, valuable traits in software development.

Referees

- Clive Onsomu, Lecturer, KCA University, onsomu@kcau.ac.ke

- Mwenda Mugambi, Digital Marketing Executive, Jambo Jet, mwenda.mugambi@jambojet.com

- Rodgers Chayuga, Senior Dev, Food 4 Education, chayugarodgers@gmail.com
